

Turn the Humid Air Around You Into Clean Drinking Water

In the age of declining water quality issues within even the best population centers. Isn't it time to consider a cost-effective and safe alternative water resource for your home or business?

The solution to having a renewable supply of clean quality drinking water is in the humid air we already breathe daily. Let us help you unlock this ultimate water resource for you today!

GridZero Inc. can design an Atmospheric Water Generating (AWG) system, built by **Watergen** the world leader in proven air-to-water technology. Whether you need 50 or 1,500 Gallons Per Day (GPD), want to operate using solar, a generator or go off the local power grid, we have the right solution to fit your need and budget.

239 GPD System

Our Estate & Vineyard Package seen here on the left incorporates a **Watergen** M PRO 239 GPD unit, a 600 gallon Stainless Steel water storage tank & Smartflower solar systems with sun tracking and energy storage battery.

The process starts with a phone call to us, then a site evaluation to define equipment & costs for a turnkey installation. Call us at **702.771.7838**
